Screen shows families with available accommodation & matching all criteria. Criteria, which include, areas, grades, and preferences (smoking/pets etc) can be changed to find more or less families. If the family to be booked is known, the user can “select” the known family, without using any criteria.

Bottom of the screen shows students in the highlighted accommodation at the same time as the booking, making it easy to make decisions on mix suitability. Families shown in **RED** have a conflict (in the above example a “Japanese” student is in the same house at the same time.)

Full details of the highlighted family are available by clicking the tabs at the top of the screen, Details, Students, Payments, Preferences and Notes.
